What's Killing My Chickens? May 19 2021 For backyard chicken keepers and large-scale farmers alike, the single greatest challenge is protecting poultry from predators. What's Killing My Chickens? is the ultimate guide to identifying the culprit behind a coop intrusion and ensuring safety for the flock. Often, by the time an attack is discovered, the predator has already left the scene. Best-selling author and chicken expert Gail Damerow uses the style of a detective manual to teach readers how to follow clues such as tracks, trails, scat, and other signs to pinpoint the attacker. Profiles describe key habits of the possible predators — ranging from raptors to rodents, foxes to bullfrogs — and provide the best techniques for blocking their access to the coop and yard, including removing attractants, using poultry guardians and lighting, and installing the most effective type of fencing. This empowering book offers essential knowledge, and peace of mind, for every chicken keeper.

How to Make Your Car Handle Jan 15 2021 To make your car handle, design a suspension system, or just learn about chassis, you'll find what you need here. Basic suspension theory is thoroughly covered: roll center, roll axis, camber change, bump steer, anti-dive, ride rate, ride balance and more. How to choose, install and modify suspensions and suspension hardware for best handling: springs, sway bars, shock absorbers, bushings, tires and wheels. Regardless of the basic layout of your car—front engine/rear drive, front engine/front drive, or rear engine/rear drive—it is covered here. Aerodynamic hardware and body modifications for reduced drag, high-speed stability and increased cornering power: spoilers, air dams, wings and ground-effects devices. How to modify and set up brakes for maximum stopping power and handling. The most complete source of handling information available. "Suspension secrets" explained in plain, understandable language so you can be the expert.

Pixie-Bob Cats Nov 24 2021 It's possible that a Pixie-wild Bob's appearance is due to their ancestry as a cross between a barn cat and a bobcat. They used to be wild, but not any more. Pixie-Bobs are lovely, affectionate cats that like spending time with their owners, including children. Discover everything there is to know about the Pixie-Bob cat breed by reading on!

American Cars, 1973-1980 Sep 22 2021 The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.
