**The Affordable Care Act and Integrated Behavioural Health Care** Apr 29 2022 This book provides a scholarly discussion of arguably the most important advance in U.S. public health services since Medicare 50 years ago - how the Federal program known as the Patient Care and Affordable Care Act of 2010 (ACA) or "Obamacare" became law. It addresses ACA in terms of its impact on improving health and behavioural health services for key diverse populations in America, including people with disabilities, consumers, women, racial and ethnic minorities, and veterans and their families. From the very beginning, ACA was controversial and the topic of heated political debate at both state and national levels. This book examines more closely how the legislation was developed, including the political history of the act; the many advocacy efforts at the national level and the community-based action strategies at the grassroots level; how ACA will affect a broad cross-section of America; the integration of health and behavioural health services as a key component of ACA; the financing of ACA and parity for behavioural health services. This book was originally published as a special issue of the Journal of Social Work in Disability & Rehabilitation.

**Making Care Count** Mar 05 2020 Use of historical and comparative approach to examine and critique the development of paid care work in the twentieth-century including health care, education and child care, and social services.

**Commando General** May 07 2020 Always marked out for high rank, Robert Laycock came into his own when selected to raise 8 Commando, a new 'crack' unit early in the Second World War. After training, 7, 8 and 11 Commandos were sent to the Middle East in early 1941 and all became Layforce under Laycock's command. Layforce was disbanded after Crete fell. Laycock took part in the abortive raid on Rommel's HQ. As commander of the Special Service Brigade Laycock played an important role in the Sicily landings and at Salerno. In October 1943 he succeeded Mountbatten as Chief of Combined Operations, coordinating combined services operations and training and attending Allied conferences. In later life Laycock became Governor of Malta and Colonel of the SAS. In this long overdue biography, the author reveals the detail of this fine soldier's character and superb military record.

*Social Services Disrupted* Apr 17 2021 This book revives the discussion on public social services and their redesign, with a focus on services relating to care and the social inclusion of vulnerable groups, providing

rich information on the changes that occurred in the organisation and supply of public social services over the last thirty years in different European places and service fields. Despite the persisting variety in social service models, three shared trends emerge: public sector disengagement, 'vertical re-scaling' of authority and 'horizontal re-mix' in the supply system. The consequences of such changes are evaluated from different perspectives - governance, social and territorial cohesion, labour market, gender - and are eventually deemed 'disruptive' in both economic and social terms. The policy implications of the restructuring are also explored. This title will be Open Access on Elgaronline.com.

Improving Outcomes in Chronic Heart Failure Feb 13 2021 Heart failure is a condition that often results in chronic tiredness and shortness of breath. It also requires complex nursing and medical treatment, especially after a hospital admission, which is all too frequent for persons with heart failure. This book describes and discusses the latest research concerning the benefits of having specially trained nurses manage the care of patients with heart failure after they have been discharged from hospital to their own home. Leading nurses and doctors from around the world discuss their experiences with this type of innovative and effective care program. Building upon these experiences, the book also contains a practical guide to developing this type of care program into a fully functional service that provides quality care to those patients admitted to hospital with heart failure.

Commonwealth Of Australia Gazette Oct 04 2022

Decentring Health and Care Networks Mar 17 2021 Networks have become a prominent template for public service governance. Often seen as an alternative to hierarchies and contracts, networks cross institutionalized organizational or sectoral boundaries to promote collaboration and the sharing of resources when addressing complex problems. Nowhere is this more the case than in the field of health services modernization and improvement. Comprising unique empirical contributions, drawn primarily from the experience of the UK National Health Service (NHS), this edited collection develops a 'decentred' analysis of health and care networks. Contributors look beyond particular structures or patterns of governance and focus instead on the interpretation of the meaningful practices of policy actors as they encounter and enact policy instruments and structures. The approach offers a distinct form of analysis that deepens and enriches more traditional public policy accounts of network governance. It recognizes the influence of local history, highlights the influence of dominant economic, technical and corporate narratives, and acknowledges the continued influence of biomedical knowledge and professional expertise. Offering practical insight for current and future service leaders about the challenges of implementing, managing and working within networks, this book draws out key messages for practitioners and researchers alike.
